

Diy Tissue Flowers with Colored Tips

Supplies: Tissues – I used 3 ply for extra fluffy flowers, Bobby pins, Markers, Scissors, & tape

1) accordion fold

2) bobby pin center

3) pinch off ends

4) color ends

First, layer 2-4 tissues on top of each other. I used 3 per flower because I had three ply. Then fold them accordion style, push a bobby pin over the center. Next pinch of the ends. I left about 2 inches on each side, but you can make any size you want. Then take a marker and color the ends.

Now starting at the top, pull each layer of the tissue apart until it is at the center. Be careful not to tear the tissue. Work your way down the side until you reach the bottom, and then repeat on the other side. Then fluff.
