

## Book hedgehog instructions

Start with a paperback book you don't want any more. It cannot have more than 100 pages, or the hedgehog will be too 'round'.

Start with folding the pages in half. Then fold back the corners, as you can see on the picture.

Continue with all the pages in the book

Until it looks like this. The papers sticking out, is the cover of the book.

Cut off the cover, the same size/shape as the folded pages.

Stick on button eyes and a nose!
